Accelerometers for vibratory feeders
REOVIB SW 10 REOVIB SW 11
REOVIB SW 70

- Aluminium-housing
- Cost-effective construction
- Low weight
- Vibrating frequency range $30 \ldots . .150 \mathrm{~Hz}$
- Suitable for use with control units
- REOVIB MFS 168
- REOVIB MFS 268

## Accelerometers for vibratory feeders

REOVIB SW 10
REOVIB SW 11
REOVIB SW 70

REOVIB SW 10, SW 11 and SW 70 accelerometers are particularly suitable for measuring the amplitude of vibratory feeder systems. They are designed for a frequency range of $30 \ldots 150 \mathrm{~Hz}$. The sensors are based on the piezo-electronic principle and they incorporate a filter that is designed for the operating frequency range, as well as an amplifier and an impedance converter. The measured value is provided as a voltage signal that is proportional to amplitude.
All components are completely sealed in an aluminium housing.
Electrical connection is made through a 4-core, screened cable. Depending on the version the terminations can be either free ends or a plug connector.
Other cable lengths can be supplied on request.

| Type | SW 10, SW 11, SW 70 |
| :--- | :--- |
| Supply voltage: | $24 \mathrm{VDC} \mathrm{(+/-12} \mathrm{V)}$ |
| Measurement range: | 20 g |
| Output: | $300 \mathrm{mV} / \mathrm{g}$ |
| Recommended fre- <br> quency range: | $30 \ldots 150 \mathrm{~Hz}$ |
| Operating temperature: | $-5 \ldots+50^{\circ} \mathrm{C}$ |
| SW 10 | Cable connection <br> Cable length 2 m |
| SW 11 | 4-pole connector <br> Cable length 2 m |
| SW 70 | 4-pole M12 plug connector <br> Cable length 2 m |
| Protection class: | IP 54 |
| Types wither frader |  |

Types with other frequency ranges are available.
